PROJECT

Barangay Malamig Online Request Certificate Services System - Capstone Project

- Developed a web-based system to digitalize the process of requesting and releasing certificates, such as barangay clearance and certificates of indigency, significantly improving transaction speed and efficiency.
- **Technology Used:** ReactJS, NodeJS, TypeScript, MySQL, TailwindCSS, Redux Toolkit, TwilioSMS, Cloudinary and more.
- **Key Features:**
 1. Automated form completion with user's registered information upon admin approval of the certificate request.
 2. SMS notification to alert users when certificate request has been approved.
 3. User-friendly interface for residents to request documents online.
